

[Climate Resolve](#) is dedicated to telling the local climate story, winning policy measures, and providing solutions that will inspire Southern California to adapt and thrive in the face of climate change. **We are seeking an intern for winter/spring 2019!**

Our intern will get the unique opportunity to be a part of a small nonprofit organization working on addressing the climate challenge in Los Angeles and Southern California. Interns get an immersive look at Climate Resolve's work in policy, communications, and advocacy. Previous intern projects have included outreach to local stakeholders and transportation advocates, research on state and local policy, and communications campaigns. We work with interns to determine the projects they're most interested in pursuing.

Intern schedules are flexible, but must be 3 days a week and 18 - 20 hours at our office in the Arts District in Downtown LA (525 S Hewitt St, Los Angeles, CA 90013). We offer interns a modest stipend and/or school credit. Position is ideal for a current student or recent graduate, but we don't discriminate based on age (or anything else).

To apply, send a resume and cover letter to info@climateresolve.org. Any inquiries or further questions can be directed there as well. **We are reviewing applications on a rolling basis, but the deadline is Wednesday, December 19, 2018.**
